HOW MOODBOARD ISNPIRED ME

In order to make my character I've conducted different sources of inspiration from the movie " Baby Boss" and other pictures that reminded me of the movie and the idea that I wanted to create. The main colors that were used in the movie were more based on the pastel colors, like blue, light skin tone and black. I picked mainly the same ones , but also added some pink in order to create the childish, color that remind of "baby". The stroke and the outline that I've chosen was also mainly based from the movie. It's not too fat and not too light.

For the texture part, I think it was the most difficult one since there isn't that much texture from the inspiration that I've seen, the texture was just plain,flat design background, nothing too special.Since its the body of a baby, I guess we could call our texture "skin".

The shapes that were mainly used from the inspiration were round shapes like circles. That was the main shape that was used for the baby's body parts, but as for the clothes and other details on the baby, rectangular figures were used for that in order to make a contracts between the body and the outfit. I've also added a pacifier as an extra element in order to complete the action of the baby loosing his pacifier and getting scared.
